prasetyodody17@gmail.com | dodycode.com | East Java, Banyuwangi, Indonesia

EDUCATION

Primakara University — Denpasar, Bali, Indonesia
Bachelor Degree of Informatics — *2017 – 2022*

RELEVANT EXPERIENCE

Remote Full Stack Developer — June 2022 – Present
Upscalix — *Merlbourne, Australia*

- Developed all backend services with nodeJS and handle server setup and deployment
- Developed web apps with Next.js, leveraging new features introduced in Next.js 14, including React Server Components, Loading UI, Streaming Data Fetching, Server Actions, and parallel routes.
- Refactor the frontend React code in Next JS to enhance performance and create a complex reusable component, such as a drag-and-drop file manager similar to Google Drive.
- Developed Thinkific course website from scratch with shopify as template engine

Full Stack Developer — Dec. 2019 – Apr. 2022
PT. Omni Hotelier International — *Gianyar, Bali, Indonesia*

- Refactor the existing Laravel Backend code to make it clean and reusable
- Identifying slow queries and bad queries on the ORM code
- Maintain and fix any bugs and issues in the Laravel Backend Code

Full Stack Developer — Jan 2018 – Nov 2019
Bisloka — *Denpasar, Bali, Indonesia*

- Developed MVP of Bisloka Booking Website from scratch using Laravel Framework and Jquery

Internship — Jul 2016 – Nov 2016
Avatar Solutions — *Denpasar, Bali, Indonesia*

- Join for Internships Program, involved in the development of .NET Desktop Application

SELECTED PROJECTS

Primakara University Official Website | *Astro JS, Strapi, AWS Lightsail*
Primakara University's official website, created with Astro JS and strapi for user content management. During this project, I redesigned the official website using the latest technology. I used Astro JS and Strapi to manage user content and developed it from the ground up. As a result, I was able to greatly improve the website's performance compared to their old WordPress website.

Vafy.ai Customer Dashboard | *Next JS, Supabase DB, Stripe Payments, Vercel*
a customer dashboard that provides an overview of voice agents' performance to help customers make data-driven improvements to their clients. On this project, I am taking advantage of the new great features introduced in Next JS 14. Such as React Server Components, Loading UI, Streaming Data Fetching, Server Actions, and parallel routes that allow you to render one or more pages within the same layout simultaneously.

Sourci CRM | *Express JS, React js, MongoDB, Lerna monorepo, AWS*
React Custom CRM for Sourci managing their projects and clients. While working on this project, I've refactored the frontend React code to improve performance and managed to implement a complex drag-and-drop file manager similar to Google Drive.

Sourci Course Platform | *Thinkific, Stripe Payments*
Sourci in-depth course put together by industry leaders and sourcing experts that cover the complex world of manufacturing and importing. I built this project from scratch, using Thinkific and Shopify as the template engine.

Sourci Official Website | *Gatsby JS, Prismic*
Sourci Landing Page, created with Gatsby JS and Prismic for user content management. I developed the Sourci website from the ground up with Gatsby JS and significantly improved its performance compared to their old Wordpress website.

Formsmate | *Sails JS, Postgres, Nodejs, Google Cloud Platform*
Form Generator to assist people in creating forms for industry-specific business process management applications. My role here was to Develop all backend services, including server setup and deployment.

Omni Hotelier Booking Engine | *Laravel PHP Framework, Vue JS*
Omni Hotelier Booking Engine that is built with Laravel PHP Framework and Vue JS as a frontend. During this time, I am gaining more experience by utilizing advanced features in Laravel, such as Queue, Task Scheduling, and Broadcasting for the Booking Engine. And I'm responsible for Identifying slow queries and bad queries on the existing ORM code as well

Bisloka Booking Website | *Laravel PHP Framework, Bootstrap, Jquery*
MVP of Bisloka Booking Website that I built from scratch with Laravel PHP Framework and JQuery. This is the first time I'm working on something professional. I use this time to gain experience in developing a website from the backend and front end.

TECHNICAL SKILLS

Languages: SQL (Postgres, MYSQL), JavaScript, HTML, CSS, SCSS, PHP
Frameworks: React, Node.js, Remix JS, Next JS, Laravel, Thinkific, Sails JS, Astro JS, Gatsby JS, Next UI, Prismic
Developer Tools: Git, Docker, VS Code, Claude AI :)
